

CLIENT

Regional Fiber Operator

OBJECTIVES

- Understand residential opportunity in all markets within 75miles of existing network
- Expected Take Rates based on competitor presence by technology (Fiber, FW, DSL, or Cable), and speed
- Identification of top expansion market opportunities with detailed market profiles

CASE STUDY

ATLANTIC-ACM leveraged an analytical approach to a rigorous regional market scan for a fiber operator to identify FTTH expansion opportunities

APPROACH

ACM leveraged internal mapping software and US Census Data to identify ~500 potential expansionmarkets

ACM used Census Block and FCC Form 477 Data to assess competitive presence and expected take rates

ACM combined data from several public, economic, and technical reports as scoring factors for expansion markets

OUTPUT

ACM provided the client with a database of expansion markets with a dynamic factor weighted scoring system to identify top markets, along with information on market dynamics for the highest rated areas
